Office Action Summary

DETAILED ACTION

1. Claims 37-50 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-18, 24-27, 36 and 51-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected because it is not clear what constitutes "a motivating gas". Also the language "introducing into the process" is confusing. It is suggested that the language be amended to read -- introducing into the synthetic fuel process --.

Claim 7 is confusing. If the asphalt emulsion is manufactured in claim 6, claim 7 should recite "wherein said asphalt emulsion is prepared by creating a mixture of water and soap; ...".

Claim 14 is rejected because it is not clear what constitutes "a motivating gas".

In claim 24, the language "wherein said introducing step comprises" should read -- wherein said step of introducing the oil-in-water asphalt emulsion --.

Art Unit: 1714

Claim 25 recites a manufacturing step similar to that of claim 7. Applicant should amend claim 25 accordingly.

Claim 36 is rejected because it is not clear how the asphalt binder is introduced into the process. Also, the language "motivating gas" is indefinite. Is the motivating gas air?

Claim 51 is rejected because it is not clear how the asphalt binder is introduced into the process when the process itself is a process for spraying the asphalt emulsion.

Claim 52 is rejected because it is not clear how the asphalt binder is introduced into the process when the process itself is a process for producing an asphalt emulsion.

Claim 55 is rejected because it is not clear what constitutes "a motivating gas".

Claims 19-23 and 28-35 are allowable because the prior art fails to teach or suggest spraying an atomized asphalt emulsion stream onto an agitated coal fines stream.

The prior art made of record but not relied upon is cited for teaching the general state of the art.
